

How we work

Internal expertise coupled with external strategic partners to facilitate a fast and reliable path to commercialization and income generation in Asia

Medical Devices

An example of collaboration model that enables technology transfer and market penetration into China as local products versus imports

*Strategic partners include:

- One of the largest third-party medical device maintenance and servicing providers in China with a reach of over 12,000 hospitals
- The largest Chinese pharmaceutical company with access to all 26 provinces and municipalities
